

HERMELA MESFIN

Junior Backend Developer

ABOUT ME

Junior Backend Developer with hands-on experience building web applications and REST APIs using Python, Django, and Django REST Framework. Experienced with PostgreSQL, JWT authentication, WebSockets, API development, and deployment. Currently pursuing a Bachelor of Pharmacy while developing my skills in backend development. A fast learner who enjoys solving problems and building secure, practical applications.

BACKEND DEVELOPMENT PERSONAL PROJECTS

Real-Time Chat Application Django, DRF, WebSockets, postgresql, Brevo

- Built REST APIs for users, conversations, and messages.
- Implemented real-time communication using Django Channels and WebSockets.
- Added authentication and user search functionality.
- Used PostgreSQL for persistent data storage.
- Implemented password recovery with OTP and email verification by Brevo.

Library Management System | Django, DRF, PostgreSQL

- Developed book, author, category, borrowing, and borrowing-item functionality.
- Implemented authentication and role-based permissions for Superuser, Librarian, and Student.
- Used Django ORM for database operations.
- Built REST APIs for managing library resources and borrowing activities.

E-Commerce API | Python, Django, DRF, PostgreSQL (in progress)...

LOCATION: REMOTE, ETHIOPIA
